

PROGRAMMABLE POWER STRIP WITH WLAN INTERFACE

PRODUCT

With the power strip with management function via WLAN you have the possibility to program 4 slots individually. The programmable timer function provides settings for individual time profiles. A connected PC gives you access to the circuits of the individual slots. For example, you can turn on the scanner as soon as you start your imaging workstation. Built-in 3-phase power protection protects your devices from dangerous surges and spikes, EMI / RFI filters eliminate 99% of interference in the 100 KHz to 1 GHz range.

FEATURES

- 4 independently programmable circuits
- With WLAN interface
- Simple programming via computer, including driver software

Display mount
