FRAME SCREEN - "BRILLIANT-G"

W/H: 400X300 CM

PRODUCT

Frame screens are characterized by an elegant, timeless design and are suitable for fixed installation. The Brilliant-G is suitable for seminar and conference halls but also for cinemas.

The Brilliant-G consists of a stable metal double frame as a steel construction for wall mounting. You can get the projection screen in different formats and designs

The Brilliant-G is suitable for direct wall mounting. It is firmly screwed by several frame elements, the quantity of elements depends on the size of the projection screen. The screen surface is attached to the back of the frame by means of tensioning rubbers.

The standard installation depth is approx. 15 cm including mounting brackets. If required, the frame can be supplied with an installation depth of approx. 11 cm using the "snap in" system. This makes installation in niches with limited installation depth and width possible without any problems.

Accessories

FEATURES
