## TECHNICAL LECTERN 2 - MOTORIZED HEIGHT-ADJUSTABLE - BARRIER-FREE

ROBUST LECTERN WITH MOTORIZED HEIGHT ADJUSTMENT

### PRODUCT

The barrier-free technical lectern 2 is used particularly in the event sector.

Whether in multifunctional hotels or universities, you will find event rooms everywhere where it is important that the speaker is guaranteed as much comfort as possible. The stepless, motorized height adjustment of approx. 30 cm ensures that the lectern can be ergonomically adjusted to the height of each speaker.

The technical lectern 2 is equipped with 4 smooth-running castors, 2 of which are lockable, so that the lectern is always mobile. We can also supply the lectern with adjustable feet on request. The front panel of the lectern is also removable so that the technology inside is easily accessible.

The lectern has a base cabinet for storing technical equipment, in which various smaller technical devices can be stored. The basic equipment includes a shelf for a glass of water and a connection panel (HDMI, USB/LAN, 3.5 jack stereo and 230V socket) in the middle under the lectern top, which is inclined approx. 8° towards the speaker.

You can customize the colour of your technical lectern 2 for an additional charge, other cost-neutral decors are also available!

(Standard: body RAL 7016 anthracite gray, front panel RAL9007 gray aluminum, base plate RAL 9005 jet black Lectern top: decor Weidbuch H1910 ST9)
