DISPLAY STAND HEIGHT ADJUSTMENT - STEPLESSBY SCREWING IN GROOVE CHANNELS - "VST-F

COLUMN: BLACK, MANUALLY HEIGHT ADJUSTABLE WITH CASTERS

PRODUCT

Due to its simple and elegant appearance, the mobile stand VST-F can be integrated into any room concept. It is also ideal for taking along to trade fairs, events and exhibitions, e.g. for company presentations.

The display up to 86" can be adjusted in height by approx. 50 cm. Included is a shelf for e.g. a laptop. This can also be flexibly adjusted in height for larger displays. Transport from room to room is no problem with the high-quality castors. They ensure smooth running, even if a display weighing up to 80 kg is already attached to it.

The universal mount according to VESA standard 100x100 - 800x600 accepts all displays up to 86". The height-adjustable shelf has dimensions of 50 x 40 cm and a maximum load of 5 kg. It is designed for laptop or keyboard shelf or can be completely removed.

So that you can set the perfect position of your display, the mobile stand VST-F allows you a continuous height adjustment of 50 cm by screwing in groove channels. For a cable-free appearance, the system's own cable management takes place within the column in two integrated cable channels.
