DISPLAY STAND WITH MOTORIZED HEIGHT ADJUSTMENT - "VST-S"

COLUMN: ANODIZED ALUMINUM WITH BASE PLATE

PRODUCT

The electric display stand VST-S is the optimal solution for office and conference rooms. Thanks to its 4 smooth-running castors, 2 of which are lockable, it can be easily moved to another room if required. Ideal for moving almost all display sizes 50 cm in height by motor. An additional height grid in the column attachment allows the height to be varied by a further 20 cm.

The display stand VST-S is available with V- or H-foot as well as with base plate. The column is optionally available in silver anodized or in black. The VST-S is equipped with a universal mount according to VESA standard 100x100 - 800x600. In the column top you will find storage space for smaller technical units. A cover for the storage compartment is included in the scope of delivery.

Due to the motorized lifting column, you can move your display up to max. 130 kg steplessly in height without any problems. Our electric display stands are equipped with an up and off switch. This is attached to the LCD mount with a bracket and is discreetly located directly below your display. This makes handling as easy as possible for you.

To guarantee you a flawless look, the system's own cable management takes place behind the column.
