## LIGHT SCREEN WITH SCISSOR JOINTS - "CABINET-A"

W/H: 250X200 CM, WITH MOTOR

### PRODUCT

The Cabinet-A projection screen is a built-in system for mounting in sideboards, drawers or media cabinets, for example. Due to the low installation depth, the very space-saving variant can be almost integrated into the environment. The projection screen is mounted on an aluminum mounting bracket. You can get the built-in projection screen in different formats and designs.

The installation takes place in sideboards, drawers or any other installation possibilities provided by the customer. A profile can be attached to the upper end strip of the Cabinet-A (with max. 500 g per running meter). The profile enables you to completely close the projection screen with the built-in furniture or similar when it is retracted and it is hardly visible.

### Accessories

Radio remote control 1-channel with hand-held transmitter

Motor drive - left

### FEATURES

- Formats up to 350x300 cm
- aluminum mounting bracket 10x4 cm
- installation depth: 13 cm
