DISPLAY STAND FOR WALL MOUNTING - "MOW 150

INCL. WALL SPACER

PRODUCT

The motorized wall mount, MOW 150, is the ideal mount so that you can safely install very large and heavy displays. The mounting is suitable for both solid stone walls and lightweight walls.

The standard version of our MOW 150 includes a mount VESA 100×100 - 800×600.

An additional height grid in the column attachment makes it possible to vary the height by 20 cm. In the column top there is an integrated shelf on the back to hold e.g. a mini-PC.

The wall mounting is done with 2 angles made of metal (installation depth approx. 7 cm). 4 floor leveling screws for leveling uneven floors are included.

The motorized lifting column is made of anodized aluminum and is also available with a black column. The VESA mount is powder coated in RAL 9005 deep black, fine structure.

Accessories

Mounting rail for shelf - 120 cm, for mounting on the
